

HSP-8100 TANK

The **SIMMONS HYDRAULIC PUMPING SYSTEM** is designed specifically for the Simmons Killers. The higher volume increases restraining roller and blade speed as well as torque, resulting in cleaner cuts.

The enclosed 40 gallon steel reservoir with Glyptol coated interior has an easily accessible built-in pressure liter and a return liter. Special liters are available for those processors who use glycol based fluid.

The **HS-8100 Pumping System** is furnished with primary and standby hydraulic pumps to supply 8.5gpm fluid at 750-800 psi. The pumps are connected to 5hp/230-460v/3ph/60Hz motors, and 5hp/575v/3ph/60Hz motors, or 5hp230/415v/3ph/50Hz motors as needed to meet local electrical specifications.

Features:

- Maintains RPM & Torque
- Primary & Standby Hydraulic Pumps
- Glycol or Petroleum Based Fluid
- 40 Gallon Steel Reservoir
- Glyptol Coated Interior
